

RENOVATING A BUSINESS OR COMMERCIAL PROPERTY?

Then start by taking advantage of opportunities to help increase energy efficiency and save money.

BUILD EFFICIENCY INTO YOUR COMMERCIAL PROJECTS AND SAVE

RECEIVE FREE ENERGY CONSULTING SERVICES

For new construction or renovation projects, contact Xcel Energy before the start of your construction to ensure you're receiving the money-saving rebates or free services available for your business. Visit xcelenergy.com/NewBusinessConstruction.

EXPLORE AVAILABLE REBATES

Energy efficiency opportunities exist in almost all parts of a commercial building. Utility rebates can make integrating energy efficiency into your project even more cost effective by helping you save money on upfront costs. Learn more by visiting xcelenergy.com/Business.

LIGHTING

Lighting rebates can help you save on a wide range of LED fixtures, occupancy sensors, and more.

COOLING

Rebates are available for upgrading entire cooling systems or just specific components.

REFRIGERATION

Upgrade existing commercial refrigeration systems at grocery and convenience stores, and earn rebates.

EFFICIENCY CONTROLS

Rebates are available for new and updated control systems, adding control points to an existing system, or micro-processor based controls.

VARIABLE FREQUENCY DRIVES (VFDS)

Rebates are available for installing VFDS, which can make your HVAC systems run more efficiently.

HEATING

Rebates are available for installing or enhancing your heating system performance through tune-ups, steam trap replacement, pipe insulation, and more.

Visit centerpointenergy.com/BusinessRebates.

DOES YOUR COMPANY INSTALL EQUIPMENT?

If so, register to become an Xcel Energy Trade Partner and earn incentives on rebate projects. Visit xcelenergy.com/TradePartners to learn more.
