69th Avenue and Anoka Street Rehabilitation Project

Project Awarded!

On November 25, 2019, the City Council awarded the 69th Avenue and Anoka Street Rehabilitation Project to Northwest Asphalt of Shakopee, MN. Northwest Asphalt provided a bid below estimate and within the project budget. Based on initial projections, we anticipate special assessments for the project to be slightly below projected amounts. Work will be phased by the contractor, with substantial completion by the end of September.

Project Schedule

It is anticipated Northwest Asphalt will begin construction as soon as the load limits have been lifted (mid-April to early May). As previously noted, the work will include pavement rehabilitation and resurfacing, concrete curb, bituminous trail, drainage swale, signal work (at Central Ave/69th Ave), concrete median (at the railroad tracks) and miscellaneous utility work. The project will reduce the roadway width for 69th Avenue by moving the southern curb line to the north to lower the amount of pavement maintenance and for storm water quality benefits.

We will be having a pre-construction meeting with the contractor in the next couple of months and will send out an update with a more detailed schedule and Frequently Asked Questions (FAQ) before construction starts.

We will provide updates to you and keep you informed of future additional developments relating to this project.

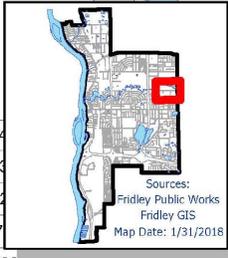

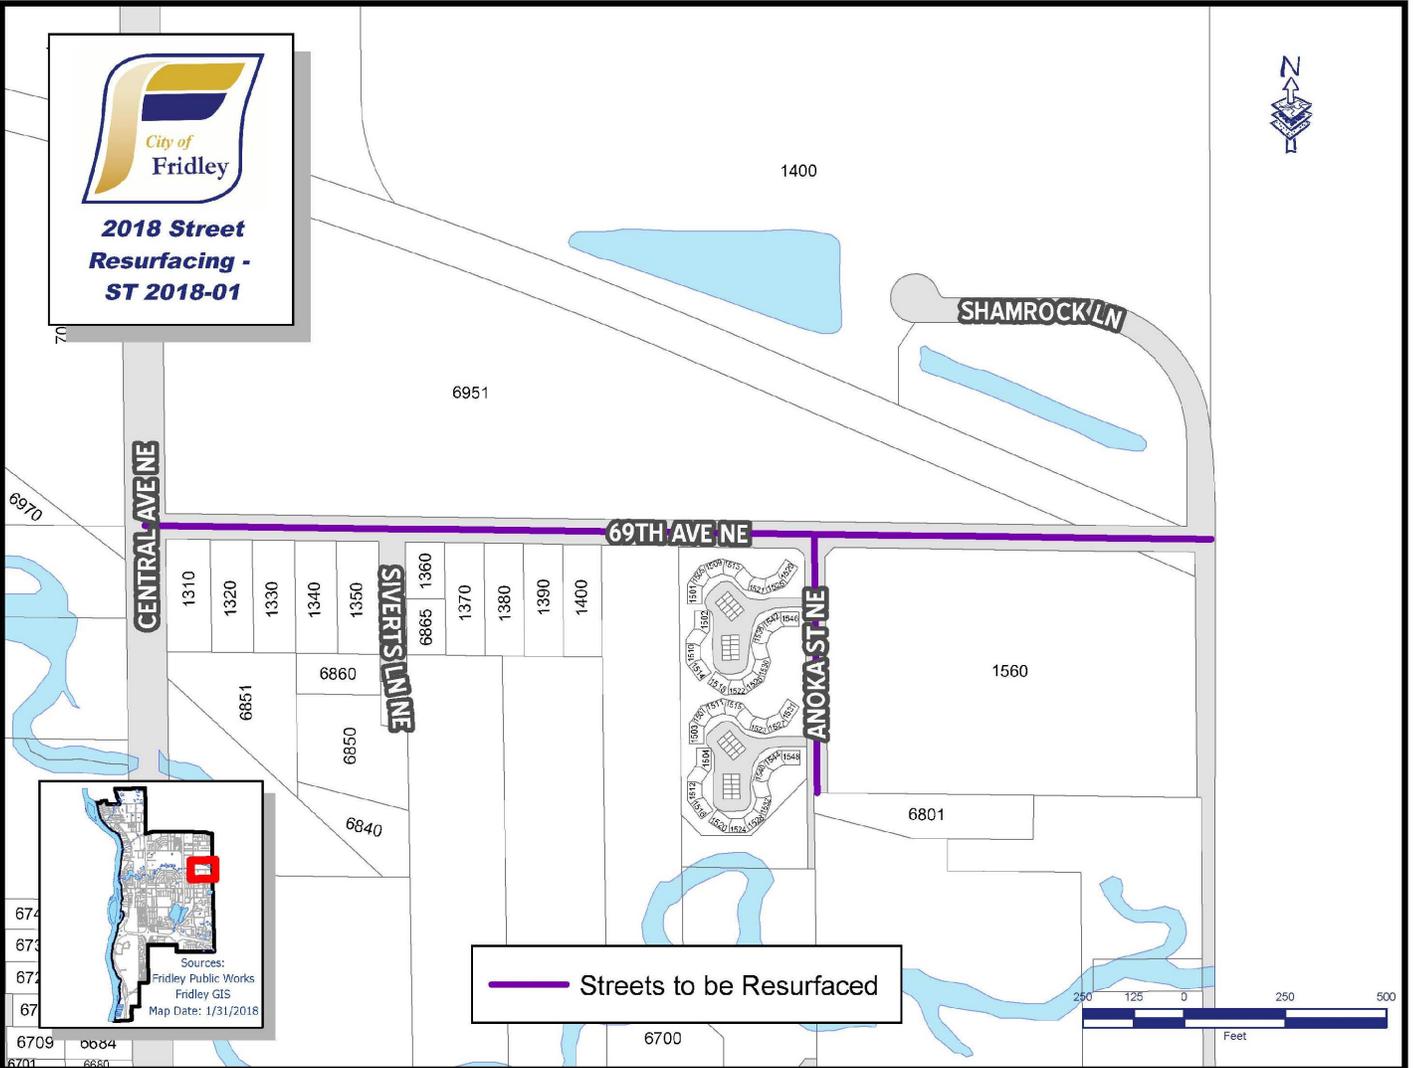

Our project engineer, Brandon Brodhag, can be reached at (763) 238-8086 if you have any questions.

See the project webpage at www.fridleymn.gov/1338 or contact the City of Fridley Engineering Division at (763) 572-3554 if you need additional information. You may view a project map and also sign up for updates to be emailed to you!
