

2025 Street Rehabilitation Project

Project Update
June 27th, 2025

Concrete Pavement Rehabilitation:

This week, the Contractor completed preliminary saw cutting and began rehabilitation of the existing concrete pavement on West Danube Road. Please note that the Contractor will be on-site performing concrete pavement rehabilitation along the southern portion of West Danube Road on Saturday, June 28th.

Once installed, the new concrete will require a curing period of up to 7 days, during which time vehicle traffic is restricted. Project residents are asked to exercise caution when navigating around newly placed concrete pavement.

Concrete pavement rehabilitation is anticipated to resume on Monday, July 7th.

Storm Sewer & Miscellaneous Utility Construction:

Next week, the Contractor will be performing select improvements to the storm sewer system within the project area along with other miscellaneous utility construction.

Garbage/Recycling Service:

During construction, it is the Contractor's responsibility to maintain garbage/recycling services for all project residents. The Contractor will move receptacles as needed to facilitate pick-up and return them to each property by the following day.

In order to assist in this process, project residents are asked to place garbage and recycling receptacles at the base of their driveway the evening prior to pick-up.

Temporary Mail Service:

As a reminder, all properties within the project area are currently placed on temporary mail service. Individual temporary mail boxes have been installed on the NW corner of North Innsbruck Drive & West Danube Road. Temporary mail service will continue for the duration of concrete pavement rehabilitation activity.

Please note that all construction scheduling is tentative, weather-dependent, and subject to change.

Construction

The Contractor's hours will be from 7:00 a.m. to 7:00 p.m., Monday-Friday. There is potential for occasional work outside of these hours with City approval.

Please keep in mind that this type of construction may generate noise, dust, mud, and be disruptive to the area. Please be patient with the Contractor and contact us if you have any concerns we can help with.

Resident Access

During construction, the City and contractor will work to minimize inconvenience to residents. That said, residents can anticipate occasional impacts to utility services and driveway access during various phases of construction. Generally, impacts to utility services are limited to short durations (hours) while driveway access may be impacted for up to 7 days during concrete work. Properties impacted by construction activity shall receive advanced written notice of such work.

For more information on construction impacts, please see the City's Construction Information and FAQs document available on the City's project webpage:
